Required

**SUPPLIER
BRIEFINGS**

What do our local companies look for in a supplier?

Join us on Wednesday, May 31st, 2017, for presentations from two local government contractors. Representatives from JWF Defense and Kitron will not only discuss their individual needs for subcontractors, but also what suppliers need to do in order to do business with them.

JWF Defense Systems is a small business, Johnstown-based manufacturer that has been supporting prototypes, low volume, and high volume build-to-print production on a variety of Department of Defense (DoD) and Federal Government programs. As part of 30 year-old JWF Industries, JWF Defense is process-based and ISO certified with a wide range of capabilities in metal manufacturing, including welding, machining, coating, assembly, vehicle builds, and project management. JWF was designed from the ground up to be a vertically integrated fabricator. This gives the company complete control over planning, scheduling, and quality. And it provides customers with an end-to-end manufacturer who supplies a cost effective, quality product.

Kitron is an Electronics Manufacturing Services (EMS) company with operations in Norway, Sweden, Lithuania, Germany, China and USA. With about 1350 highly skilled employees, Kitron manufactures and delivers anything from fully assembled electronic circuit boards to complete products for customers globally. Related technical services like prototyping, industrialization, material analyzing and test development are also key competencies offered by Kitron. The Market Sectors that Kitron Group supports are Defense/ Aerospace, Medical Device, Industry, Offshore/ Marine and Energy/ Telecoms. Kitron, means greater flexibility, cost efficiency, accuracy and innovation power along the entire value chain.

**Required pre-registration closes at
8:00 am Friday, May 26th, 2017**
